ABOUT

Before my first line of code, I spent five years on the other side of the screen, working in luxury retail, restaurant management and a dance studio, learning what people's actually need. Now I'm a student majoring in Master of Applied Computing based in Hamilton, learning how to build it. I care as much about why a feature exists as how it's built. I'm excited about AI tools that make great software more accessible, and I'm looking for a team that ships for real people, small business owners and designers.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Bootstrap 5, Jinja2, Chart.js

Backend & Data: Python, Flask, PostgreSQL, SQL

Practices: Agile, Scrum, SDLC, software testing, documentation, PR-based collaboration

Tools: Git, GitHub, Jira, PythonAnywhere, Microsoft 365 & Teams

AI & Learning: Hands-on with AI coding agents — Codex (OpenAI), Google Antigravity and DeepSeek; excited to add Claude Code

PROJECTS

Eco Kaitiaki Hub — Web Application for Environmental Data | *Team Project, Lincoln University*

- Built full-stack features with Python, Flask, PostgreSQL, JavaScript, HTML and CSS.
- Worked in Agile Scrum sprints — planning, task tracking and reviews in Jira; version control and pull requests on GitHub.
- Tested, debugged and deployed the application to production on PythonAnywhere.

Demo: qichang1128954.pythonanywhere.com Code: github.com/Charmaine-Chang/eco_kaitiaki_hub

Selwyn Vet Services — Web Application | *Individual Project, Lincoln University*

- Delivered end-to-end: requirements, design, build, testing, documentation and a live demo.
- Practised explaining technical choices simply — the same skill I want to bring to PR reviews.

CCMC Hamilton — Church Management System | *Personal Project, Hamilton Chinese Methodist Church*

- Built a full-stack Flask + MySQL web app (Python, Bootstrap, JavaScript) featuring custom RBAC, bilingual UI, and Chart.js reports.

- Wrote 26 pytest tests, automated GitHub Actions CI (MySQL 8), and deployed to production on Render + TiDB Cloud.
- Used AI coding assistants (OpenAI Codex) to accelerate development, debug issues, and generate unit tests.
- Demo: ccmc-ham.onrender.com Code: github.com/Charmaine-Chang/CCMC_HAM

EDUCATION

Master of Applied Computing (Part-time) | Lincoln University 2025 – present

Master of Business (Finance) — Distinction | Lincoln University 2021 – 2023

Graduate Diploma in Applied Management | Ara Institute of Canterbury 2017 – 2018

Bachelor of International Economics & Trade | China University of Mining & Technology 2012 – 2016

CERTIFICATIONS & ACHIEVEMENTS

- Master of Business (Finance) with Distinction — strong A-range academic record.
- CFA Research Challenge participant (2022).
- Bloomberg Market Concepts certification.

PROFESSIONAL EXPERIENCE

Luxury Retail Sales Professional | Walker & Hall & Swarovski | Nov 2021 – present

- Consultative selling: listen first, then recommend — built long-term relationships and repeat customers.
- Used POS and CRM systems daily to track customers, preferences and follow-ups — my first lesson in good user data.

Duty Manager / Supervisor | Dragon House Restaurant | Jun 2018 – May 2021

- Ran daily operations, workflow, inventory and staff scheduling; improved processes to lift service and efficiency.

Dance Tutor & Administration Support | Beyond Dance Studio | Jan 2020 – Oct 2024

- Taught dance classes and coordinated events, students, parents and staff — communication and patience under pressure.

INTERESTS

Hip-hop dance, videography, music remixing, jewellery design and rock climbing. I like making things — a beat, a bracelet, a feature — and I bring that same curiosity to code.
